

BRAND STORY

Who Is Force Factor?

Force Factor is an American nutritional supplement company founded by Harvard-alumni entrepreneurs and industry-leading scientists with a mission: to create accessible supplements with scientifically studied key ingredients that help real people look, feel, and perform at their best. From creatine, heart health, and metabolism support to pre workouts, recovery supplements, multivitamins, and more, our products are designed to help you Unleash Your Potential.

We've sold over 16 million products worldwide and are one of the top-selling supplement brands on Amazon. Every formula is manufactured in GMP-compliant facilities and is third-party tested for purity and potency.

Force Factor Takes Pride In:

- Transparent labeling
- Clinically studied key ingredients
- Effective doses backed by science
- Domestic manufacturing
- Carbon neutrality certification
- 100% usage of post-consumer recycled plastic on bottles and caps

FAQ's

What are Hair Growth Accelerator Capsules, and what do they do?

Force Factor Hair Growth Accelerator Capsules are clinical-strength hair growth multivitamin vegetable capsules formulated to promote the growth of thicker-looking, fuller hair by supporting normal hair growth cycles and structural hair proteins. The formula features Lustriva®, a patented biotin and silicon complex designed to increase the percentage of thicker terminal hair. In addition to Lustriva®, this comprehensive formula provides vitamins, minerals, marine collagen, and botanical extracts to support hair through all stages of growth.

What are the key ingredients, and why are they included?

This hair growth multivitamin combines clinically studied and biologically relevant nutrients that support hair structure and follicle health:

Lustriva® (magnesium biotinate + inositol-stabilized arginine silicate) to support hair thickness and an improvement in the ratio of percent terminal (thick) to vellus (fine) hair, as evaluated in clinical research.

Biotin (as magnesium biotinate) to support keratin production and normal hair growth.

Marine Collagen peptides to supply key amino acids that support hair structure and help maintain skin elasticity where hair follicles are rooted.

Zinc to support the normal structure of hair and healthy protein synthesis.

Vitamins A, C, D, and E to support antioxidant balance, collagen production, healthy hair follicles, and cellular function.

Saw Palmetto extract to support healthy function of the pathways involved in the conversion process of testosterone to DHT.

Horsetail extract (a source of silica) to support collagen production and structural integrity.

Each ingredient supports nutrient delivery, structural integrity, and the normal biological processes involved in healthy hair.

How is this different from other products in this category?

Many hair supplements rely on high-dose biotin alone. This formula is a comprehensive hair growth multivitamin that combines a more soluble and bioavailable form of biotin with collagen, zinc, fat-soluble vitamins, and a patented silicon complex clinically evaluated for positive changes in hair thickness and terminal hair percentage.

Rather than focusing solely on one nutrient, this formulation supports multiple structural and metabolic pathways involved in hair growth.

Is this product made in the USA?

Yes. Force Factor Hair Growth Accelerator Capsules are manufactured in GMP-compliant facilities in the United States using high-quality domestic and imported ingredients.

Is this product safe?

Yes. This product is safe and formulated for healthy adult women and men aged 18 years or older looking to support healthy hair growth and thickness. Some supplements may interact with certain medications and/or interfere with certain lab tests. It is advisable to consult with your doctor before using biotin doses above 2,500mcg per day. If any adverse reactions occur, stop use and consult your doctor.

Is this product third-party tested?

Yes, like all Force Factor products, each batch is third-party tested for identity, purity, and quality. All Force Factor supplements are manufactured in GMP-compliant facilities.

How do I take Force Factor Hair Growth Accelerator Capsules?

Take three capsules once daily with breakfast as part of a consistent routine. Supporting normal hair growth cycles depends on steady nutrient availability, so daily use helps maintain ongoing support for follicles and structural proteins.

When is the best time to take it?

Force Factor Hair Growth Accelerator Capsules are best taken once daily with breakfast to support absorption of key nutrients, including fat-soluble vitamins. Consistency matters more than precise timing, as supporting normal hair growth cycles depends on sustained nutrient availability over time.

How long until I notice results?

Hair grows in cycles that span several weeks. In a clinical study on Lustriva®, measurable improvements in hair thickness were observed starting in as little as 3 weeks,* with continued improvements through 12 weeks. Individual timelines vary, but consistent daily use supports overall results.

Do I need to take this every day?

Yes. Hair follicles cycle continuously, and nutrients involved in keratin production, collagen synthesis, and cellular metabolism work best when available consistently. Skipping days may reduce steady support.

Can I take this on an empty stomach?

It is recommended to take Force Factor Hair Growth Accelerator Capsules with breakfast to support nutrient absorption. Taking it with food may also help reduce the potential for stomach sensitivity.

Can I stack this with other Force Factor products?

Yes. This product can be used alongside other Force Factor supplements. Use only as directed. Consult a healthcare professional before use if you are pregnant or nursing, have a medical condition, or use prescription medications. Some supplements may interact with certain medications and/or interfere with certain lab tests. It is advisable to consult with your doctor before using biotin doses above 2,500mcg per day. If any adverse reactions occur, stop use and consult your doctor. Be sure to look at nutrient labels for overlapping nutrients.

Does this supplement support healthy skin and nails?

Yes. Lustriva can help reduce fine lines and wrinkles. The formula also contains antioxidants and ingredients known to support healthy skin and nails such as biotin, vitamin C, vitamin E, and collagen.

Can I take this with other collagen supplements?

Yes. This formula already includes marine collagen peptides and supports collagen synthesis through vitamin C and silicon. It may be used alongside additional collagen products if desired.

Should I continue using this after I see results?

Hair growth is an ongoing biological process. Continued use helps maintain nutrient support for structural proteins and normal hair growth cycles.

What happens if I stop taking it?

Hair naturally cycles through growth and resting phases. Discontinuing supplementation simply means nutrients are no longer being provided at supplemental levels.

Is this safe for women?

Yes. Force Factor Hair Growth Accelerator Capsules are formulated for healthy adult women and men looking to support healthy hair growth and thickness. The ingredients support structural proteins, antioxidant balance, and normal hair growth cycles. Use only as directed. Consult a healthcare professional before use if you are pregnant or nursing, have a medical condition, or use prescription medications. Some supplements may interact with certain medications and/or interfere with certain lab tests. It is advisable to consult with your doctor before using biotin doses above 2,500mcg per day. If any adverse reactions occur, stop use and consult your doctor.

Is this safe for people over 50?

Yes. Hair structure and growth cycles naturally change with age. This hair growth multivitamin supports collagen production, keratin synthesis, antioxidant protection, and cellular function, which are relevant across adult life stages. As with any supplement, adults over 50 should consult their healthcare provider before starting a new product. Use only as directed. Consult a healthcare professional before use if you are pregnant or nursing, have a medical condition, or use prescription medications. Some supplements may interact with certain medications and/or interfere with certain lab tests. It is advisable to consult with your doctor before using biotin doses above 2,500mcg per day. If any adverse reactions occur, stop use and consult your doctor.

Is this safe for children?

No. Force Factor Hair Growth Accelerator Capsules are formulated for healthy adult women and men looking to support healthy hair growth and thickness. The ingredients support structural proteins, antioxidant balance, and normal hair growth cycles. Use only as directed. Consult a healthcare professional before use if you are pregnant or nursing, have a medical condition, or use prescription medications. Some supplements may interact with certain medications and/or interfere with certain lab tests. It is advisable to consult with your doctor before using biotin doses above 2,500mcg per day. If any adverse reactions occur, stop use and consult your doctor.

Can I take this if I have a medical condition or prescription medication?

If you are pregnant, nursing, taking prescription medication, or managing a medical condition, consult your healthcare provider before use. This ensures the supplement fits appropriately into your individual health plan.

Is this safe for diabetics?

If you are diabetic or monitoring blood sugar, consult your healthcare provider before use. Individuals managing blood glucose should always review supplement ingredients with their healthcare professional.

Is this product stimulant-free? Does it contain caffeine?

This product is stimulant-free and contains no caffeine.

Will this product make me jittery or affect my sleep?

No. Because it does not contain stimulants, this formula is not associated with jitteriness or sleep disruption.

Is this product gluten free?

Yes. Force Factor Hair Growth Accelerator Capsules are gluten-free.

Is this product allergen free?

This product contains marine collagen derived from fish. Individuals with fish allergies should consult their healthcare provider before use. Always review the full ingredient list if you have specific allergies. Manufactured by equipment which may process products containing milk, eggs, soy, wheat, shellfish, fish, tree nuts, peanuts, and sesame.

Is this product vegan or vegetarian?

No. This formula contains marine collagen and is not suitable for vegans or vegetarians.

Is this safe to take long term?

Hair growth support typically requires ongoing nutrient availability. This product is designed for daily use as part of a long-term wellness routine. Consult your healthcare provider for personalized guidance.

Does this affect hormones?

This product does not contain hormones. It includes Saw Palmetto extract, which supports healthy function of pathways involved in the conversion of testosterone to DHT. It is not a hormone therapy. If you have concerns about hormonal health, consult your healthcare provider.

Is this safe for postpartum hair concerns?

This product supports normal hair growth cycles and structural integrity. If you are pregnant or breastfeeding, consult your healthcare provider before use.

Can men use this product?

Yes. Hair follicle biology is similar across genders. This formula supports healthy hair growth and thickness for adult men and women.

Is this FDA approved?

Dietary supplements are not FDA approved. However, this product is manufactured in GMP-compliant facilities that follow strict quality standards.

Can I take this with other vitamins?

Yes. It can be used alongside other vitamins and supplements, but always review ingredient labels for overlapping nutrients as some vitamins and minerals, like Vitamin A, D, E, and Zinc, have recommended daily upper limits. Consult your healthcare provider for personalized guidance.

How many people have used this product?

Force Factor products have been trusted by millions of customers worldwide across multiple wellness categories since 2009. Hair Growth Accelerator is one of the brand's most popular products, and the Hair Growth Accelerator brand, including capsules and soft chews, has thousands of Amazon reviews.

Are there clinical studies supporting this formula?

Hair Growth Accelerator has not been clinically studied as a whole formula, however it does include a clinically studied ingredient. The key ingredient complex Lustriva® was evaluated in a

double-blind clinical study that measured changes in hair thickness and the percentage of terminal versus vellus hair.

Participants experienced statistically significant increases in hair thickness in as little as 3 weeks,* with continued improvements observed through 12 weeks. Individual results vary.

Importantly, the study evaluated measurable structural hair changes rather than subjective survey responses.

What quality standards does the product meet?

Force Factor Hair Growth Accelerator Capsules are:

Manufactured in American GMP-compliant facilities

Gluten-free

Non-GMO

Each batch is third-party tested to ensure quality and ingredient identity.

Is this clinically proven?

The finished product itself has not been independently studied. However, Lustriva®, the key ingredient complex included in this formula, has been evaluated in a controlled clinical study measuring hair thickness and terminal hair percentage.

Is this better than prescription options?

This product is a dietary supplement designed to support normal hair growth cycles and structural hair proteins. It is not intended to replace prescription medications. Individuals considering medical treatment should consult their healthcare provider. This product is not intended to diagnose, treat, cure, or prevent any disease.

Does this product use proprietary blends?

No. The ingredients and amounts are fully disclosed on the Supplement Facts panel.

Why does bioavailability matter with hair supplements?

Absorption and solubility influence how nutrients support biological processes. For example, magnesium biotinate, used in this formula, is a more soluble form of biotin, which supports nutrient availability for keratin production and normal hair growth.

Is this a cosmetic product or a supplement?

This is a dietary supplement designed to support hair structure from within by providing nutrients involved in keratin production, collagen synthesis, cellular metabolism, and antioxidant protection.

Where can I buy this?

Force Factor Hair Growth Accelerator Capsules are available on Amazon and select retail partners. Availability may vary by location.

Is this available on Amazon?

Yes. Force Factor Hair Growth Accelerator Capsules are available for purchase on Amazon. Shipping options, pricing, and availability are determined by Amazon at the time of purchase.

Is this eligible for fast shipping?

Shipping speed and eligibility depend on Amazon's fulfillment status at the time of purchase. Refer to the product listing page for current delivery options.

What is the return policy?

Return policies vary depending on the retailer. If purchased on Amazon, returns are subject to Amazon's return and refund policies. Customers should review the retailer's policy before purchase.

What if I'm not satisfied?

Customer service inquiries and returns are handled by the retailer where the product was purchased. If purchased through Amazon, customers may contact Amazon Customer Support for assistance.

How should I store this product?

Store in a cool, dry place away from direct heat, light, and moisture. Keep out of reach of children.

Does this product expire?

Yes. Dietary supplements have a printed expiration date or best buy dated on the bottle. Use before these dates for best quality.

Does this need to be refrigerated?

No. Refrigeration is not required. Store at room temperature in a dry environment.

USE-CASE + LIFESTYLE SCENARIOS

Postpartum Wellness Reset

After pregnancy, many women notice temporary changes in hair density due to natural hormonal shifts. As the body returns to its normal rhythm, supporting structural proteins, collagen production, and antioxidant balance may help maintain healthy-looking hair. Force Factor Hair Growth Accelerator Capsules provide comprehensive nutrient support, including a clinical-strength hair growth multivitamin blend with marine collagen, zinc, and Lustriva®, as part of a broader wellness routine. (Consult a healthcare provider if breastfeeding.)

Pairs well with:

- Force Factor Better Turmeric Maximum Joint Support

Hair Thinning

You catch your reflection under office lighting and notice your hair looks a little thinner than it used to. Long workdays, stress, and inconsistent nutrition can impact normal hair growth cycles. Force Factor Hair Growth Accelerator Capsules fit easily into a morning routine and support thicker-looking hair over time through structural protein support, cellular metabolism, and targeted follicle nutrients.

Pairs well with:

- Force Factor Smarter Greens Soft Chews

40+ Years Old Hair Maintenance

Hair structure and thickness naturally change with age. Supporting collagen production, antioxidant protection, zinc status, and normal follicle function becomes increasingly important. Adults over 40 often use Force Factor Hair Growth Accelerator Capsules as a daily hair growth multivitamin to help maintain healthy hair and support thicker-looking hair as part of a long-term hair care strategy.

Pairs well with:

- Force Factor Total Beets Ultimate Heart Health
- Force Factor Smarter Greens

Fitness-Focused Lifestyle

Frequent training and active lifestyles place higher demands on nutrient metabolism and protein turnover. Keratin production and structural support require consistent nutrient availability. Force Factor Hair Growth Accelerator Capsules support normal hair growth cycles while fitting into a structured daily supplement routine.

Pairs well with:

- Force Factor Creatine Monohydrate Gummies

Long-Term Hair Health

Some users begin supplementing before noticeable changes occur. Supporting normal hair growth cycles, antioxidant balance, collagen synthesis, and DHT-related pathways can be part of a proactive hair wellness strategy. Force Factor Hair Growth Accelerator Capsules provide multi-nutrient support designed for sustained use.

Pairs well with:

- Force Factor Collagen Boosting Superfoods

HOW TO USE

Building It into Your Morning Routine

Most users incorporate Force Factor Hair Growth Accelerator Capsules into their morning wellness routine alongside multivitamins or greens. Taking the capsules with breakfast helps support absorption of key nutrients, helps prevent an upset stomach, and ensures consistent nutrient availability for keratin production, collagen synthesis, and cellular metabolism. Hair growth support is cumulative, so regular daily intake matters more than precise timing.

Stacking Within a Broader Wellness Plan

Hair structure depends on multiple biological systems, including protein synthesis, antioxidant balance, and nutrient metabolism. Many users combine Hair Growth Accelerator Capsules with:

- Force Factor Smarter Greens Soft Chews for daily phytonutrient support
- Force Factor Collagen Boosting Superfoods for additional structural protein support

When stacking supplements, review ingredient labels to avoid duplicating nutrients such as biotin, vitamin A, vitamin D, vitamin E, or zinc.

What to Expect: Weeks 1–3

Hair follicles operate in cycles. During the first few weeks, internal nutrient support begins working at the structural level. In a clinical study on Lustriva®, measurable improvements in hair thickness were observed as early as 3 weeks.* Not everyone will notice visible changes immediately, as growth patterns vary by individual.

What to Expect: Weeks 3 and Beyond

Hair growth and hair health are influenced by ongoing biological cycles. Continued daily use supports sustained nutrient availability for keratin production, collagen synthesis, and follicle support. Clinical measurements in the Lustriva® study were maintained through 12 weeks. Hair wellness is best approached as a long-term strategy rather than a short-term intervention.

Using It Proactively

Some users begin supplementing before noticeable changes occur. Supporting structural proteins, antioxidant balance, collagen production, and nutrient delivery can be part of a proactive hair wellness strategy.

Travel and Routine Changes

Hair Growth Accelerator Capsules are easy to incorporate into travel or busy schedules. Maintaining daily consistency during travel helps preserve steady nutrient support for normal hair growth cycles.

Integrating with Topical Hair Care

This product is designed to support hair from within. It may be used alongside shampoos, conditioners, or topical treatments as part of a broader hair care routine. Consult your healthcare provider for personalized guidance.

COMPARISON LANGUAGE

Unlike basic biotin-only supplements, how is this formula different?

Many hair supplements rely on high-dose standard biotin alone. Force Factor Hair Growth Accelerator Capsules are formulated as a comprehensive hair growth multivitamin featuring Lustriva®, a patented complex combining magnesium biotinate with silicon and arginine, evaluated in a controlled clinical study measuring hair thickness and terminal hair percentage. In addition, the formula includes marine collagen, zinc, fat-soluble vitamins, and botanical extracts to support multiple structural and metabolic pathways involved in hair growth.

How is magnesium biotinate different from standard biotin?

Magnesium biotinate is significantly more soluble than standard D-biotin. Solubility influences absorption, which supports nutrient availability for keratin synthesis and normal hair growth processes.

How is this different from stimulant-based hair products?

Force Factor Hair Growth Accelerator Capsules are stimulant-free and do not contain caffeine or hormones. The formula supports structural proteins, antioxidant balance, and normal hair growth cycles rather than relying on short-term stimulation.

How is this different from topical hair treatments?

Topical products primarily work at the surface level. This supplement is designed to support hair structure from within by providing nutrients involved in keratin production, collagen synthesis, cellular metabolism, and follicle-level support.

Is this meant to be a quick fix?

Hair growth occurs in biological cycles that require sustained nutrient support. The Lustriva® complex was evaluated over multiple weeks to assess measurable changes in hair thickness and terminal hair percentage, reinforcing a long-term wellness approach.

PROBLEM/SOLUTION FRAMING

Noticing your hair looks thinner than it used to?

Hair density can change due to age, stress, and normal shifts in growth cycles. Force Factor Hair Growth Accelerator Capsules are formulated as a clinical-strength hair growth multivitamin to support the growth of thicker-looking hair by promoting normal hair growth cycles and supporting an increase in the percentage of terminal (thicker) hair, as evaluated in a clinical study on Lustriva®.

Seeing more hair in the shower or brush?

Hair naturally cycles through growth and resting phases. Supporting keratin production, collagen synthesis, zinc status, and antioxidant balance helps maintain normal hair structure and follicle health over time. This formula provides targeted nutrients designed to support those structural processes.

Struggling with fine, flat, or low-density hair?

Hair fullness is influenced by strand thickness and the balance between vellus (fine) and terminal (thicker) hair. The Lustriva® complex has been studied for its ability to increase the percentage of thick terminal hair, helping support a fuller-looking appearance.

Experiencing hair changes after pregnancy?

Temporary shifts in hair density are common after hormonal changes. Supporting normal growth cycles, collagen production, and structural proteins through targeted nutrients may help

maintain healthy-looking hair as the body rebalances. Consult a healthcare provider if pregnant or breastfeeding.

Feeling like your hair isn't as strong as it used to be?

Hair strength depends on keratin and connective tissue support. Biotin supports keratin synthesis, while marine collagen and vitamin C support collagen production. Together, these nutrients help support hair structure from within.

Want to support hair growth without stimulants or hormones?

Force Factor Hair Growth Accelerator Capsules are stimulant-free and do not contain hormones. The formula focuses on nutrient-based structural support, including support for pathways involved in DHT conversion, rather than short-term stimulation.

Looking for a hair supplement with a clinically studied ingredient?

The Lustriva® ingredient complex included in this formula was evaluated in a double-blind clinical study measuring changes in hair thickness and terminal hair percentage over 3–12 weeks, providing measurable data on structural hair support.*

Trying to maintain hair thickness as you age?

Hair structure and density naturally change over time. Supporting antioxidant balance, collagen synthesis, zinc status, and normal hair growth cycles can help maintain fuller-looking hair long term.

Want to be proactive before thinning becomes noticeable?

Supporting structural proteins, nutrient delivery, and healthy DHT-related pathways early may help maintain normal hair growth patterns as part of a long-term hair wellness strategy.

Frustrated with products that only work on the surface?

While topical products focus on the outer hair shaft, this supplement supports hair from within by providing nutrients involved in keratin production, collagen synthesis, cellular metabolism, and structural integrity.

CREDIBILITY SIGNALS

Is this product manufactured under quality standards?

Force Factor Hair Growth Accelerator Capsules are produced in GMP-compliant facilities in the United States. These facilities follow regulated manufacturing protocols designed to help ensure product quality, consistency, and safety.

Is Force Factor a CarbonNeutral® certified company?

Yes. Force Factor has achieved CarbonNeutral® Company certification in accordance with The CarbonNeutral Protocol, a leading global framework for carbon neutrality. This certification means the company measures, reduces, and offsets its carbon emissions through verified environmental projects.

What does CarbonNeutral® certification mean?

CarbonNeutral® certification indicates that a company has assessed its carbon footprint, taken steps to reduce emissions where possible, and offset remaining emissions through independently verified climate projects. The certification follows The CarbonNeutral Protocol, a recognized global standard.

Does Force Factor use sustainable packaging?

Yes. Force Factor has transitioned to 100% post-consumer recycled (PCR) plastic in all bottles and caps. Using PCR plastic helps reduce plastic waste and gives previously used materials a second life.

What is 100% PCR plastic?

PCR stands for post-consumer recycled plastic. This material is sourced from previously used plastic products that have been recycled and processed for reuse. Using 100% PCR plastic reduces reliance on virgin plastic and supports waste reduction efforts.

How does using PCR plastic benefit the environment?

Using post-consumer recycled plastic helps reduce plastic waste, lower carbon emissions associated with new plastic production, conserve energy, and decrease dependence on fossil fuels.

Why does sustainability matter in supplements?

Supplement manufacturing and packaging can contribute to environmental impact. By using CarbonNeutral® certification and 100% PCR plastic packaging, Force Factor aims to reduce environmental footprint while delivering high-quality wellness products.

**In a clinical study by Kalman et al. (2021) on 90 female subjects with self-reported hair thinning, those taking 160 mg of Lustiva® per day experienced a significant increase in hair thickness at week 3 compared to placebo, as seen by an improvement in the ratio of percent vellus (thin) to terminal (thick) hair. These statements have not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure, or prevent any disease.*
